

## Gabrielle "People May Come"

Visit "[People May Come](#)" on MotoLyrics.com

Reaching out  
Don't know what you'll find  
Always reaching out  
Hoping you'll find love  
Cos when it comes  
You'll hold on tight  
But wonder will it ever survive  
How long will it take  
For love to stand by you

Cos everybody needs  
Someone to love  
And everybody needs  
Someone they can trust and know

Cos people may come  
And people will go away  
They can cause you disappointment and pain  
They come as your friend  
Though some in the end  
They can leave you disappointed

You're in doubt  
You've been down that road  
Met many people  
Who have left you cold  
They pretend they're on your side  
But soon draw their knives  
Gotta learn to figure out  
Just who's right and wrong for you

Cos everybody needs  
Someone to love  
And everybody needs  
Someone they can trust and know

Cos people may come  
And people may go away  
They can cause you disappointment and pain  
They come as your friend  
Though some in the end  
They can leave you disappointed

Gotta learn to read the signs  
Gotta learn whos wrong from right  
Gotta learn who is your friend  
And will be there to the end for you  
Gotta learn to live your life  
Gotta learn to walk with pride  
Gotta keep that in your mind  
Gotta know deep down inside whos true

Cos everybody needs  
Someone to love  
And everybody needs  
Someone they can trust and know

Cos people may come  
And people may go away  
They can cause you disappointment and pain  
They come as your friend  
Though some in the end  
They can leave you disappointed

Cos everybody needs  
Someone to love  
And everybody needs  
Someone they can trust and know

Cos people will come  
And people will go away  
They can cause you disappointment and pain  
They come as your friend  
Though some in the end  
They can leave you disappointed
