I'll burn you away  
Crack the wall of hate  
Let the fight begin  
To know why we live in this providence

Since the day we met  
I've kept fighting into the wind  
I don't need a false  
The flame is calling me  
Beware of the night  
I'll never step aside  
We'll overcome  
No one can stop the raid

I swear in this holy night  
I'll never die until the end  
Into the fight of hell and glory  
Now the light is calling me  
See the circle of the fire  
We're here to burn up all the night

Rain falls in the darkness  
A blast voice calls the power  
Now the time to receive  
the judgement for the might for the liberty  
Into the heat  
We are soldiers  
Into the heat  
We are warriors  
We get the force of the steel  
That will never give up  
In the night, we just raid you again

Since the day we met  
I've kept fighting into the wind  
I don't need a false  
The flame is calling me  
Beware of the night  
I'll never step aside  
We'll overcome  
No one can stop the raid

I swear in this holy night  
I'll never die until the end  
Into the fight of hell and glory  
Now the light is calling me  
See the circle of the fire  
We're here to burn up all the night

Rain falls in the darkness  
A blast voice calls the power  
Now the time to receive  
the judgement for the might for the liberty  
Into the heat  
We are soldiers  
Into the heat
