i was just wandering after love  
???? if i started falling anywhere around here  
'cause i swear that i saw in the sky, a comet  
a star flying high everywhere  
if you know me, know me, know you can show me  
yes i know, if you want, move close to the sun  
and ohh...  
and ohh...  
i feel that, too young, i know it's all wrong  
we walk through the field without a care in the world  
if you know me, know me, know you can show me  
yes i know, if you want, move close to the sun  
and ohh...  
and ohh...  
and all we are is all we are  
and all we are is all we are
