GAMMA - VOYAGER

The dark of the sky - the light of the moon
The solitary figure will be home real soon
He has braved the storms of time - his life is on the
line
He's been prayin' to his saviour
Please take me away from here

The man on the ship - has a lot to fear
He hasn't seen home - in almost a year

When darkness falls - he goes by the stars
Getting directions from Jupiter and Mars
It was he who created this strife

He is fighting for his life
He is longing to see - His wife and his family

CHORUS then SOLO

Well will things be the same -
When he gets home again
Will his children still remember -
The man who went away
The year that has gone past -
All the places he has been
He'll remember to the last -
The worlds that he has seen

CHORUS

Oh oh oh

Fade to end
