(verse 1)

Falling so far and fast like the ocean tides again, and
now im wondering when this is gonna end, this storm
will be the end of me, and it started with you, so hold
on tight cause the water is deep, if we're going to get
through

(chorus)

we only know what step we're on
so hold your breath cause the water is cold
when you get lost i've let you go
so hold on tight and never let go

(verse 2)

Stuck in this watery tomb fully submerged with no way
out, of here im wondering is this the end, this storm will
be the end of me, and it started with you, so hold on
tight cause the water is deep, if we're going to get
through

(chorus)

we only know what step we're on
so hold your breath cause the water is cold
when you get lost i've let you go
so hold on tight and never let go

(outro)

Held in my cell i sit day after day
wondering what the hell that got us this way
there was no explanation, no ryme or reason
you've torn my exsistance for your own amusement
I'll never forgive the things that you've done
the words that you've spoke should be slit from your
tounge

I'll await the day, i stand over your grave, rise for the
seas and witness a brand new day
