Pendulum

Are you lonely on the run
From exhausting everyone
Everyone

Absolum

Can't you see the damage done
Offer temporary sun
Temporary sun

And I dont wanna go down with you
You've got shoes nobody can fill
But the bigger part of me
Loves you still

Dead man's curve

Never think in time to swerve
Till my lesson has been learned
You're one more lesson learned
And you're a hard-brick wall
Tell me baby did I break through at all
Or can you even recall
Can't you recall?

I don't wanna go down with you
You've got shoes nobody can fill
But the bigger part of me
Loves you still
Still, yeah

I don't wanna go down with you
My heart gets the best of my will
And the bigger part of me
Loves you still
I love you still
I love you still
I love still
Still...
