I sure do hope this is a long night
Cause I have never felt one so right
Each look into your eyes, I'm fallin'
A little more and more
Looks like we started us a fire
Wrapped up in flames of desire
With every touch, they're burnin' higher
Two shadows dancin' on the wall

With nothin' on but the radio
Feel the music playin' soft and slow
You and me and the lights down low
With nothin' on but the radio

We'll fall asleep here in the moonlight
In tangled sheets, we'll be here all night
And when we wake up in the morning
We might stay like this all day
Two people meant to be together
Two lovers dreamin' of forever
And it just keeps on gettin' better
With every tender little kiss

Nothin' on but the radio
Feel the music playin' soft and slow
You and me and the lights down low
With nothin' on but the radio

Two people meant to be together
Two lovers dreamin' of forever
And it just keeps on gettin' better
With nothin' on but the radio
Feel the music playin' soft and slow
You and me and the lights down low
With nothin' on but the radio

You and me and the lights down low
With nothin' on but the radio
