By Gary Chapman

I wish my mind wouldn't argue with my heart  
It splits the day apart  
Into time well spent and time just thrown away  
I wish my heart would please make up my mind  
I'm wasting so much time  
Gotta catch a glimpse of how it's gonna be

CHORUS:

When finally  
I look inside your eyes and see  
Reflections of yourself in me  
The way you always said it would be  
When finally  
I'm loving you like you love me  
It happened oh so easily  
I looked at you and it came to me  
Finally  
The day to day just keeps on spinning round  
But this one thing I have found  
I can close my eyes and be there in your arms  
You take me to a place that's safe and warm  
You're my harbor in the storm  
Wanna lose myself in being there with you  
(REPEAT CHORUS)

When finally  
I look inside your eyes and see  
Reflections of yourself in me  
The way you always said it would be  
When finally  
I'm loving you like you love me  
It happened oh so easily  
I looked at you and the love in your heart  
Cut right through to me  
And my eyes can see  
Finally
