Nobody has anything intelligent to say
I turn the radio I become the Dj.
Everyone it's playing games that I don't wanna play
I close my eyes, I take my mind to a better place
I know I'm happy in a parallel life

But it sounds like you're having in better time
I can hear it through the walls, through the wall I can
hear it?
You know I never really thought that was like that kind
of music
let the dramas, here they are, like the wAY I am feeling
I can hear it through the walls and I start to believe that,
believe that

You've never say how long I ever see you in my heart

...

Maybe I should ring your bell, we were never alone
Tonight I close my eyes and dream about you

...

I know we're crazy

...

You know I never really thought that was like that kind
of music
let the dramas, here they are, like the wAY I am feeling
I can hear it through the walls and I start to believe that,
believe that, believe that , believe that

I know you can hear me
Come close so you can feel me
Knock knock invite me in
Kepp keep in on party
Can get m sleep

I can hear it through the walls, through the wall I can
hear it?

You know I never really thought that was like that kind
of music

let the dramas, here they are, like the wAY I am feeling
I can hear it through the walls and I start to believe that
