I wish I could get through to you
Seems like you don't want me to
But still I try
I know when you're not feeling strong
Things for you are going wrong
But still I try

I remember the first time
That I looked into your eyes
I remember the first day
Of your life

You're my flesh and blood
I knew it from the very first moment
You're my flesh and blood
I knew it from the very first moment

I've seen the sadness in your eyes
I wish that I could paint your skies
A brighter blue
You build these walls around yourself
Protecting you so no-one else
Can get to you

You're my flesh and blood
I knew it from the very first moment
You're my flesh and blood
I knew it from the very first moment

You're my flesh and blood
I knew it from the very first moment
You're my flesh and blood
I knew it from the very first moment

You're my flesh and blood
I knew it from the very first moment
You're my flesh and blood
I knew it from the very first moment
My flesh and blood
My flesh and blood
