### "Make It Better"

Visit "[Make It Better](#)" on [MotoLyrics.com](http://MotoLyrics.com)

Lately I've started seeing things it takes a little faith to  
believe in  
And it feels a little easier like you've got someone  
holding your hand  
So hang a bouquet from your pocket and if it starts a  
conversation  
You can talk about the way it seems we're starting to  
discover  
We're all in this thing together after all

We can make it better,  
If we work together  
Like a soul projector,  
I wanna see it this way  
I wanna see it this way

I don't belong on this planet but for the moment this is  
where I am  
So no point in wasting this vacation, I wanna see all I  
can.  
And if someday I'm flying around it, I'd like to say I left  
it better  
Than it was the day I found it and I hope that when I'm  
home  
I'll recognize a couple faces I know

We can make it better,  
If we work together  
Like a soul projector,  
We wanna see it this way  
We wanna see it this way

We can make it better,  
If we work together  
Like a soul projector,  
I wanna see it this way  
I wanna see it this way.
