nothing out of the ordinary
i see your smile, i need your love
if you could only let me
show you the meaning of it

something bout the way that your eyes wander
maybe soon enough, they'll look at me
and maybe sometime you'll start to wonder
could it be him? well i could be

i could be the one to show you love again
i could be the one you talk about to all your friends
i could be the one to swear i'll never let you go
if i had you
take your heart
let me in

so here i am i can barely take it
i wanna know what you feel inside

am i gonna be the one that gets to hold you
make you laugh when you wanna cry
here i am, here you are, there you go
take me

i could be the one to show you love again
i could be the one you talk about to all your friends
i could be the one to swear i'll never let you go
if i had you
take your heart
let me in

here i am,
here you are,
there you go
let me in
