I saw you just the other day at our old spot
Was gonna say hi, but guess I just froze up
So I drove by, thinking of the past times
And how our years just seemed to always fly by

My mind took me back like it was only yesterday
We were little, we were maybe in the 4th grade
A kiss on the cheek girl, was all it would take
Had me wrapped around your finger, never knew about
a heartbreak

It made me think to all the years, that you were right
there
And all the times you said you love me when you felt
scared
Thinking you was only saying it, to say love
Because I never quite understood the meaning of it

But I know now, I try to tell you but your never home
And when I try to call, you got no phone
And so I'm hoping that you hear this song
Because I need you baby, nah I can't do it alone

Not without you, not without love
Not without everything that we worked for
Without you, I would be lost
No motivation, no hesitation
Not without you

Listen, I know it's late but baby wake up and talk
Cause I don't wanna lose the only chance I have to say
it all
I miss the time before the stars and the fame
Back when you were still the girl that had me going
insane

I know that time is passing by, I hope your happier now
And even though I stumbled up, I see you out in the
crowd
I mightve given up on love, and maybe that isn't best
But when you cry, I swear to god it rips my heart from

my chest

Remember time when I was down, and said I felt out of place

Back in the days when what I said would leave me red in the face

Yeah, I miss that, so don't you ever forget

You were the girl, when I was seventeen who gave me a kid

I never asked for this gift, but god, he gave it to me
Thought I was ready for the task he was making me see

And when you tell me that you love me, I hold on to the years

Because without you, I'd prolly drown myself in them tears

Not without you, not without love
Not without everything that we worked for
Without you, I would be lost
No motivation, no hesitation
Not without you

Not without love
Everything we worked for
I would be lost
No motivation, no hesitation
Not without you

Not without you
No, no, no, no,
Not without you
