Help save the youth of America

Help save them from themselves

Help save the sun-tanned surfer boys

And the Californian girls

When the lights go out in the rest of the World

What do our cousins say

They're playing in the sun and having fun fun fun

Till Daddy takes the gun away

From the Big Church to the Big River

And out to the Shining Sea

This is the Land of Opportunity

And there's a Monkey Trial on tv

A nation with their freezers full

Are dancing in their seats

While outside another nation

Is sleeping in the streets

Don't tell me the old old story

Tell me the truth this time

Is the Man in the Mask or the Indian

An enemy or a friend of mine

Help save the youth of America

Help save the youth of the World
Help save the boys in the uniform
Their mothers and their faithful girls
Listen to the voice of the soldier
Down in the killing zone
Talking about the cost of living
And the price of bringing him home
They're already shipping the body bags
Down below the Rio Grande
But you can fight for democracy at home
And not in some foreign land
And the fate of the great United States
Is entwined with the fate of us all
And the incident in Tschernobyl proves
The World we live in is very small
And the cities of Europe have burned before
And they may yet burn again
And if they do I hope you understand
That Washington will burn with them
Omaha will burn with them
Los Alamos will burn with them
