Gobi desert 1925 search party barely made it back  
alive  
When they opened up that burlap sack  
Everybody there had to jump back  
Smell the ozone, hear the crack  
Shootin like a comet it was hard to track

Tourist poking through the curios  
Strange odor up and caught her by the nose  
When she opened up that burlap sack  
Everybody there had to jump back  
Smell the ozone, hear the crack  
Movin like a comet it was hard to track

Shriveled digits locate your soul  
Reach inside remove it whole

Magic hand they found the magic hand  
They saw the magic hand

Clean it up for the museum show  
Custodian unlock the closet door  
When he opened up that burlap sack  
A blinding flash made him jump back  
Smell the ozone, hear the crack  
Shootin like a comet it was hard to track

... hand of the nomad

Shriveled digits locate your soul  
Reach inside remove it whole

Magic hand they found the magic hand  
They saw the magic hand
