Confidence and hope  
I'm looking forward to future plans  
Not able to realize yet  
Makes me wanna take a rope  
or swallow some pills any time  
But let's have a look  
In the distance I see light  
Gives me satisfaction  
Keeps me hangin' on  
When stability is gone  
I take my own life  
I make the decisions  
I have a goal

That's worth living  
Confidence in what I do  
realising my hope  
That's the bright side I'm looking for  
But I know how to take it  
In times when my life looks shattered  
and I'm not feeling to well  
Confused when I think  
Which direction not for sure  
Dreams far away  
Time doesn't seem to go on
