Drawn lies, strong and clear
Make it bend to your will
All the lines interface
So hard to make stand still
Till the flaws disappear
Till what's wrong disappears
Till all that's wrong will disappear
Working at perfekt
Got me down on my knees
Success to failure
Just a matter of degrees
Success to failure
Just a matter of degrees
All the colors of the day
Have somehow disappeared
All the colors of the universe
Are closer than they appear
Are not as close as they appear
Are not as close as they appear
Are not as close as they appear
Nothing is perfekt, certainly not me

Success to failure

Is just a matter of degrees

Working at perfekt

Got me down on my knees

And when it's right, it's right as rain

And when it's right, there is no pain

And when it's right, it's not again

Working at perfekt

Got you down on your knees

Success to failure

Just a matter of degrees

Success to failure

Just a matter of degrees
