sorry for the inconvenience that this may cause | we
came to conquer but we had to pause | we have a life-
long money lack guarantee | we are a risk to national
security | at the right time | in the right spot | ready or
not | at the right time | in the right spot | ready or not |
from Montreal to Senegal | this is your wake-up call | if
this was too fast for you let me explain | would you
please leave the building | it's our domain | we'll make
you think we're clever | you will agree | and you will
scream when I ask: "are you with
me?" | at the right time | in the right spot |
ready or not | at the right time | in the right spot | ready
or not | from Montreal to Senegal | this is your wake-up
call | from Donegal to North Nepal | this is your wake-up
call | at the right time | in the right spot | ready or not |
at the right time | in the right spot | ready or not
