Discover the treatment before the disease
Discover the treatment

I'm feeling so awake, my eyes see all there is
Bursting with anticipation, longing just to please
It's up to you if you drink no-one's forcing you
My head is spinning round with this spacey nausea

Discover the treatment before the disease
Discover the treatment

Everything just cracks you up, the whole wide world
Seems fun
Good times they're a rolling on with the bad ones yet
To come
Pretty soon you're in a hole, no money and no friends
Your one track mind has been derailed there seems to
be
No end

It's the hair of the dog
The dog bites back
It's the hair of the dog

Discover the treatment before the disease
Discover the treatment

Then you come stomping in, shoot everything down in
Flames
You're only happy when you've got someone to blame
The real culprit sits right there in your hand
Do you need your medicine to make your mind
expand?

It's the hair of the dog
The dog bites back
It's the hair of the dog
