Cinematic lights are glowing  
Visions every where  
Night line, takes me to a world so unknown

Systematic time is ticking  
Getting close to you  
Star Line, the brightness only guide to you

You're looking up into my world and see it's Moving  
Suddenly I see the way you see me Vibrant

There's light in the stars  
There's light in the sky  
There's light in my dreams  
There's night and day

You and I we share the vision us, only one

There's love in the stars  
There's love in the sky  
There's love in my dreams  
There's love and peace

You and I we share the vision us, only one  
When the time comes, show you what I see

Synchronizing, thoughts are dreamy  
Wishing all comes true  
Star Line, flashes light waves through the sky

You're looking up into my world and see it's Moving  
Suddenly I see the way you see me Vibrant

There's light in the stars  
There's light in the sky  
There's light in my dreams  
There's night and day

You and I we share the vision us, only one

There's love in the stars

There's love in the sky  
There's love in my dreams  
There's love and peace

You and I we share the vision us, only one  
When the time comes, show me what you see
