Say you wanna make it the nighttime's deadly stare  
Never ever dreamed I'd deliver such a deep forbidden  
lair

Tempt you take it, I'll take you for a ride  
Forever down by the river where I'll breath you deep  
inside

Say push [f](#), [-A](#)! Say push it in [f](#), [-A](#)! Say  
push [f](#), [-A](#)! Say push it [f](#), [-A](#)! in

There is no pain without my name, there is no pain  
without my name

There is no pain at all

Strip! In a fever lick my carcass

I need to rape your shattered bones

In a fever you were taken from my bed

I need to suck you in!

My severed sore, you were a victim of my pain within

Tormented twin, my pain within

To live without your presence is but a sin

Because I need your pain, I need your pumping brain

I need to break you

Ripping [f](#), [-A](#)! Tearing [f](#), [-A](#)! I need to strip  
the flesh
