FRIENDS

Where would I be without friends, to take good care of
me,

My friends,

What would I do I would be alone

On my own

Enemies, some say add spice to your life

But I've always hated to be so disliked

I can't see why in this short span of time

Anyone does without friends

FRIENDS

Will always help when you're feeling down,

On the ground,

You're friends

Will put a shoulder to the wheel

I feel

Enemies, some say add spice to your life

But I've always hated to be so disliked

I can't see why in this short span of time

Anyone does without friends

FRIENDS

This is a song to thank you all

For being my good friends,

You only number just a few,

But you are my good friends
