Evolution

All the do's and don't's will help you find your way

Resolution

And you got to stand tall open minded every day

Mysteries exist for us to find dem

Nothing never happens until it reach the time then

Metaphors and miracles dem just a blind dem

And if you live in fear and doubt

You will always stay behind then

The master got his eyes on what you doing

So humble yourself of your blessings will be ruin

Nuh see no rain a fall heavens gate a call

And without no love the boss him nuh go listen

Houses build by wisdom

Small large or medium

But it's overstanding that we turn it ina kingdom

So many paths to know one way we a go

There is no sacrifice when what you seek is freedom

Nothin new about the things we are doing

And there is nothing new about the words we are saying

Confusion in our feeling in search of the meaning

Longing for the spiritual healing

Prophet priests and kings

Same song dem a sing

Seek your soul mankinin and no bother with the bling

Cause certain frequencies connect humanity

And speak of the vanity love and shear infinity

Got to learn the rules so I can break dem properly

If I nab a loose I man nuh loose none me clarity

Bun dem authority senseless ideology

Help me sing da song deh with me
