A tag and a war and a blur and a bla

Polition on their mission  
Try fi mash up fi we vision  
Continously no intermission  
With dem guns and all dem wars  
Dem try fi create a division  
We nuh go get tricked by dem religion  
Ask dem how do you feel in those cages  
How do you feel dat you will never live  
To see certain stages  
And all those books and those pages  
You never read them  
So you caught up in your riches and your rages
