Alright, great job

Dear momma, no need for the head drama
I quit slinging that yac', don't need the feds on us
I made a mil' off the deal, legit
And after I pay the tax, I'ma buy us a crib

In the winter, I'ma buy us a whip
So we can take long trips, just me and the kids
I'm up again, I never let you down
Nothings ever gonna stop me now

I'm up from the gwop, don't gotta hide from the cops
Plus homies got a spot, they can stay off the block
They can drop a few tracks or spar a few minds
The God, home from the pen, he left the yard behind

Got a brand new sampler, take the breaks and I loop it
Got a license for the gat in case the public is stupid
Plus I ain't afraid to shoot it
A man with the family is firmly rooted

We on top right now, we living
Ain't nobody saying it, can't nobody fade us
Oh and look at this luxury, sweet in here
We did it, we ain't gotta worry 'bout nothing no more

We on top right now, we living
Ain't nobody saying it, can't nobody fade us
I always knew you was gonna make it
You was a dreamer from day one

What shall I speak, about the brothers that passed?
Make me weak about the knees, make me wanna bust
ass
Or should I kick knowledge and I ain't even graduate
But take it from me, it ain't cool to skip class, imagine it

Five Gods, came to picture perfect to ovulate to it
Music and expression of freedom, escape to it
Not much to it, we was born and conceived to it
And me being the man that I am, it's like we knew it

Surrounded by a civilized man, a weak woman
Subconsciously be planting a fed inside children
Allow me to explain my cause
Who I B E R E, Double T A, N I N E

A.k.a K I N E T I C
My attribute B O R N, G O D, Allah
Searching for the truth in myself, I seen, I saw
In order to achieve it all, must give my all

I always knew you was gonna make it
You was a dreamer from day one
Look at how you killing 'em right now
Why don't you go get you a massage or something,
daddy

Ain't gotta worry 'bout none of that
Matter fact pass me the oil
I got you all day, you know you did your thing
Just sit back and relax

Yeah, Off up in the C H I C A to the G O
Where the winter time temperature be twenty below
Knee deep in the snow the Reverend still get dough
To pay the bills, feed his family and go get more

Money, now we taking trips to Jamaica just to relax
My homies came a long way since paper from g-packs
But gone, they used to be pushing BP's and Zenax
Now, they wire us our paper back and forth like we fax

We ask the lord and savior for guidance
It's probably hard to hear us over gunshots and
violence
Figure when I'm in the casket it'll be plenty silence
So in the end when you add it up it all balance

The crew been up, staying higher than pallets
On vacations in the islands, watching women with
talents
Fellowship and with the family members who be the
wildest
Now we live in mansions, castles and golden palaces

Enjoy everything that you put your hard work into
Look at the gold on the lamp, baby

Look at the size of this TV
Look at everything

Just take up all the beauty in this room right now
Look at how you did your thing, you did it
We living right now
We ain't gotta worry 'bout nothing no more, yeah

Up again, I'll never let you down
Nothing's ever gonna stop me now
Up again, I'll never let you down
Nothing's ever gonna stop me now

Up again, I'll never let you down
Nothing's ever gonna stop us now
Up again, I'll never you down
Never let you down, never let you down

Up again, I'll never you down
Nothing's ever gonna stop us now
Up again, I'll never you down
Nothing's ever gonna stop us now

Up again, I'll never you down
Nothing's ever gonna stop us now
Up again, I'll never you down
Nothing's ever gonna stop us now

Up again, I'll never you down
Nothing's ever gonna stop us now
Up again, I'll never you down
Nothing's ever gonna stop us now

Bobby, make this world digital
Bobby, your love is so digital
Spell my name, B O B B Y
B O B B Y, Bobby, repeat after me
B, B, O, O, B, B, B, B, Y, Y
D, D, I, I, G, G, I, I, T, T, A, A, L, L
