Something happened to me late last night  
Felt so warm and free holding her so tight

Now I got this fever  
Covers me from coast to coast and all day

She took a hold of my feelings  
With a simple soft demand  
She had the power to move me  
And I played right into her hands

Now I got this fever  
But I found out that  
Love's supposed to be this way

Chorus:  
Angelina, you the queen of my make believe  
Someday we'll cross the line, you and me  
It's the morning after, Angelina

Love late into the night is just a state of mind  
'Cause I'm in love with a woman that'll never be mine

I got this fever,  
Covers me from coast to coast and all day

Put the devil behind me  
Making time on a tired old town  
Where the night life makes me crazy  
Crazy for that little girl

Done got this fever  
And it follows me through the valley of the shamed

Chorus:
