Something happened to me late last night
Felt so warm and free holding her so tight

Now I got this fever
Covers me from coast to coast and all day

She took a hold of my feelings
With a simple soft demand
She had the power to move me
And I played right into her hands

Now I got this fever
But I found out that
Love's supposed to be this way

Chorus:
Angelina, your the queen of my make believe
Someday we'll cross the line, you and me

It's the morning after, Angelina

Love late into the night is just a state of mind
'Cause I'm in love with a woman that'll never be mine

I got this fever,
Covers me from coast to coast and all day

Put the devil behind me
Making time on a tired old town
Where the night life makes me crazy
Crazy for that little girl

Done got this fever
And it follows me through the valley of the shamed

Chorus:
