Accident'ly in your arms
That's all it took
Knowing how you need and want me
With just one look.

To leave you now is something
You should know that I can't do
I stayed long enough
To fall in love with you.

Long enough to know that
What I feel won't go away
Just lookin' won't be near enough
After today.

Everything I need is
Everything I see in you
I stayed long enough
To fall in love with you.

--- Instrumental ---

Oh, long enough to know that
What I feel won't go away
And just lookin' won't be near enough
After today.

Everything I need is
Everything I see in you
I stayed long enough
To fall in love with you.

I stayed just long enough
To fall in love with you...
