

George Jones "It Sure Was Good"

Visit "[It Sure Was Good](#)" on MotoLyrics.com

We don't know what it was but we had it
We don't where it went but we lost it
And it may never come back again but I see wish it
would
We don't know what it was but it sure was good.

First time I laid eyes on you I saw it
Shining in your eyes was bright as day
And when I held you in my arms I felt it
Oh but like a fool I let it slip away.

We don't know what it was but we had it
We don't where it went but we lost it
And it may never come back again but I see wish it
would
We don't know what it was but it sure was good.

First time that we kissed I could taste it
Sweet upon my lips like a song
The moment we made love I knew we found it
One day I woken up and it was gone.

We don't know what it was but we had it
We don't where it went but we lost it
And it may never come back again but I see wish it
would
We don't know what it was but it sure was good.

If you had one more chance would you take it
And would you stand beside me from now on
The second time around could we make it
And would you be there with me hold it on.

We don't know what it was but we had it
We don't where it went but we lost it
And it may never come back again but I see wish it
would
We don't know what it was but it sure was good.

No, we don't know what it was but it sure was good...
