Your lonely nights are over for there's someone new  
And he doesn't neglect you like I used to do  
Once again you're smiling once again life is fun  
Yeah your lonely nights are over and mine have just  
begun

In a far away city where I lingered a while  
I kept thinkin' about you of your eyes and your smile  
I decided I love you and came back yesterday  
Now I find that your teardrops washed your love from  
me away

[ guitar - piano ]  
Oh your lonely nights are over...
