I could listen to you talk for hours
Even watch you walk away
I could think of ways to tease and please you
Think of ways to make you stay

I could taste every lovely, lovely inch of you
But there's something, something
I could never do

Chorus

I could never have just pieces of your heart
I could never live a day without your love
I could never let you go without a fight
Do everything I can and know to keep it right
These things I would never do (aaah ah ah)
I need a chance to show to you (aaah ah ah)
I live and I breathe just for you (aaah ah ah)

I could do the things that make you happy
Not the things that make you cry

I'd walk the burning coals if you ask me
Do anything, for you I'd die
I even wrote and sing this song for you
But there's something, something
I could never do

I could taste every lovely, lovely inch of you
But there's something, something
I could never do

Chorus

I could never have just pieces of your heart
I could never live a day without your love
I could never let you go without a fight
Do everything I can and know to keep it right
These things I would never do (aaah ah ah)
I need a chance to show to you (aaah ah ah)
I live and I breathe just for you (aaah ah ah)
