You're out on the town  
Playin' it cool  
While she hangs around  
Playin' your fool  
But what's really goin' down  
Who's foolin' who  
She's just a woman  
She's just a woman  
With the blues

Now night after night  
She stays at home  
And you know it right  
To constantly roam  
It's her life to choose  
But that's no excuse  
She's just a woman  
She's just a woman  
With the blues

And this pain in her heart  
She keeps to herself  
But you know from the start  
There was nobody else  
Yes, she loves only you  
And her love is true  
She's just a woman  
She's just a woman  
With the blues

Now one of these days  
You'll wake up and find  
That she's changed her ways  
And she's changed her mind  
And the love you've refused  
Is the love you will lose  
So don't give your woman  
Don't give your woman  
The blues
