Sometimes I can't see you, beautiful  
I need you to show me secrets  
Can you breathe, so I can hear you  
Say to me that you're not leaving

Sad boy flies and comes down broken  
Realize that I can't without you  
Cloudless blue inside of your eyes  
It's so much clearer when I'm with you  
No where else is where I want to be  
And when you're gone I'll always know where you are  
Just think of me and I will you  
Since when you're gone I will always know where you  
are  
Just think of me and you know that I will think of you
