It's midnight and I miss your body
I can't eat sleep dreamings of tonight
Waiting for words, I wait long
And you turn off the lights

But I love you, baby
A little bit, sinkin' in is what I like
And I wait for
But I'm bound to see what I despise

Played it all for the game
Played it all, played the same
And in the end I could see
The ketamine is killing me

I can feel you rising coming up taking
Hold of my insides, something's not right
I want off, too late to change the ride
But I loved you bab, another hit for
Road is what I like, now my head's gone
And I feel right now that I could die

Played it all for the game
Played it all, played the same
And in the end I could see
The ketamine is killing me
