"Enough Time"

Visit "[Enough Time](#)" on MotoLyrics.com

If I had enough time
We could be together now
Staring at each other
It goes in one ear and out of the other
And now you've found your own love
And if it couldn't make matters worse
I thought I'd try my own luck
It couldn't hurt
It couldn't hurt

We've started now and this can't stop
No this can't stop
[x4]

Love was there to tease us
In the loneliest of times
Then it came to feed us
And draw us back to each other
And put up the wrong signs
And if it couldn't make matters worse
We went and found another sign
It couldn't hurt
It couldn't hurt

We've started now and this can't stop
No this can't stop
[x4]

If it will be it's meant to be [x8]

We've started now and this can't stop
No this can't stop
[repeat until fade]
