"Vs"

Visit "[Vs](#)" on MotoLyrics.com

You see our face
And know our name
By the way we hold our stare
One look at us
It's obvious
That we don't even care

We've been around your kind before
You sit around the place
And all you ever do is run your mouth
We'll rock as you walk out the door
But cant you hear the crowd?
They're screaming they want more

We grind your nerves
As you salute
The make up of our band
And your choice words
To bring us down
Match the finger in your hand

We've been around your kind before
You sit around the place
And all you ever do is run your mouth
We'll rock as you walk out the door
But cant you hear the crowd?
They're screaming they want more

(crowd screaming)

We've been around your kind before
You sit around the place
And all you ever do is run your mouth
We'll rock as you walk out the door
But cant you hear the crowd?
They're screaming they want more
Woah woah woah woah!
