I'll rip the eyeballs from your head  
Your innards boiled internally  
Cremator flays you one by one  
Sending ashes into eternity  
Dissector's good with a sharpened hook  
I'll gut you like a fish  
Fermentor will anatomize  
Against your every wish  
Your face we'll burn right off your skull  
It's my only vice  
Decapitated with a scythe  
Your bones we'll fashion into dice  
Spilled out organs we devour  
I eat mine with a frosty brew  
Your fate is sealed, as is your tomb  
You're really getting screwed  
Your death will not be swift  
At the hands of the mentally deficient  
Slaughtering in the cemetery  
We're nothing if not efficient

A knife across your fucking throat  
I'll drink right from the slit  
The blood is gulped through filthy hoods  
And from our fingers licked  
A pile of meat is all that remains  
Quivering in the crypt  
Your splattered torso steaming now  
Where flesh has been unzipped  
Entombed within the catacombs  
Your grave an unmarked open ditch  
Decaying in the fetid swamp  
Your bones are black as pitch  
Maniaxe!!!
