"Best Friends"

Visit "[Best Friends](#)" on [MotoLyrics.com](#)

Put your hands up
Raise your hands up
Put up a hand for your best friends
Put your hands up
Raise your hands up
Put up a hand for your best friends

Some friends come, some friends go
But there's no one like you
You're the only friends I would tell my secrets to
We've got a special bond that no one can break
through
We're just like sisters and we stick together like glue

'Cause you know that we can read each others' minds
And we've got each others' backs all the time
So, we just thought that we would let you know
We'll be your friends for sure, oh

Best friends
Girls, they never let each other down
We're best friends
No matter what will always be around
When you need someone to talk to
Girls, you can count on us to be your best friends

When you're glad, when you're sad
We will be right here
Anything you go through, call us up and share
That's what friends are for
We will lend an ear
Any burden that you carry will be ours to bear

'Cause you know that we can read each others' minds
And we've got each others' backs all the time
So, we just thought that we would let you know
We'll be your friends for sure, oh

Best friends
Girls, they never let each other down
We're best friends

No matter what will always be around
When you need someone to talk to
Girls, you can count on us to be your best friends

Girlfriends, count on us
We will be around whenever you need us
Friends for life, yes, indeed
Got each others' back permanently

Put your hands up
Raise your hands up
Put up a hand for your best friends
Put your hands up
Raise your hands up
Put up a hand for your best friends

Best friends
Girls, they never let each other down
We're best friends
No matter what will always be around
When you need someone to talk to
Girls, you can count on us to be your best friends

Best friends
We're best friends, no matter what
Best friends
Girls, you can count on us to be your best friends
