VERSE:

If ever I needed someone
It's you and now - oh
'Cause you bring out some feelings
More than the law will allow
I can be down
You pick me from the crowd
I thought I lost everything -
Then my mood swings.....

CHORUS:

I haven't lost
What I can find in you
Baby.....
You know just what to do
To make a friendship band
Turn to a diamond ring
I simply touch your hand
And my mood swings
In a vicious cycle of depression once
Not too long ago
But I'm over it now

Not a second too soon

You came and made light shine from the moon

Like there was nothing to it

Boy, I don't know how you do it

CHORUS

Lovin' you - it's an old cliché

But it's like a dream come true every day

There's no other love in this world

Than the love you're getting

From this girl

'Cause if ever

I needed somebody

It's you and now

Thought I lost everything

Mood Swings

You make a friendship band

Turn to a diamond ring

I simply touch your hand

And my mood swings
