

Giddy Stratospheres

"The Long Blondes"

Visit "[The Long Blondes](#)" on MotoLyrics.com

You're pretty, oh so pretty
Why waste your time just sitting
Here a-listening to this dead-eye bitch?

Do nothing, eat your chocolate,
Drink your wine, she won't let you
Make your way across her empire line!

What's eating you is a mystery
But go home with her one more time
And you know you'll be history

Watch movies with the lights on
Sit still; keep her tights on
Do you see this once and timeless week?
Go on, say something clever
Just act(s) it, she will never
Take you higher than her attic room

What's eating you is a mystery
But go home with her one more time
And you know you'll be history

She'll never take you to giddy stratospheres that come
from your fears!
She'll never take you to giddy stratospheres that come
from your fears!

Is she a femme fatale?
That's what she wants you to think
She'll never lead him astray
But it's the best she can do
But is she going away?
No, she'll always be here,
Waiting for you
Back here on earth

Your mother call your mother
Even she's surprised that this is how you want to spend
your nights indoors
You never call too often. what's up?
Have forgotten what it's like to have her on all fours?

What's eating you is a mystery,
But go home with her one more time
And you know you'll be history..

She'll never take you to giddy stratospheres that come
from your fears!
She'll never take you to giddy stratospheres that come
from your fears!

Is she a femme fatale?
That's what she wants you to think
She'll never lead him astray!
But it's the best she can do
But is she going away?
No, she'll always be here,
Waiting for you
Back here on earth

There's a train at
The station
It's leaving
This morning
It'll take you
Away from
This girl that's
So boring

Don't turn around just walk away
Don't turn around just walk away
Don't turn around JUST WALK AWAY

She'll never take you to giddy stratospheres that come
from your fears!
She'll never take you to giddy stratospheres that come
from your fears!

Is she a femme fatale?
That's what she wants you to think
She'll never lead him astray!
But it's the best she can do
But is she going away?
No, she'll always be here,
Waiting for you
Back here on earth
