

Brave Saint Saturn "The Sun Also Rises"

Visit "[The Sun Also Rises](#)" on MotoLyrics.com

The chord runs up the microphone
I flip the switch, we're going home
Transistor's right on time
Resistors fall in line
Capacitors are at full
All engines good, no breach of hull
With all the hope that i could beg or borrow
I can't wait, can't wait for tomorrow

I believe the sun also rises
Dries our tears
Bringing the blue skies of day
I believe the sun also rises
Lighting our past, driving the darkness away
So far away
So far away

Microchips will pave the way
The circuitry will work ok
With all the hope that i could beg or borrow
I can't wait, can't wait for tomorrow

I believe the sun also rises
Dries our tears
Bringing the blue skies of day
I believe the sun also rises
Lighting our past, driving the darkness away
So far away
So far away

I believe the sun also rises
Dries our tears
Bringing the blue skies of day
I believe the sun also rises
Lighting our past, driving the darkness away
So far away
So far away
