Touch my face find a place  
That only you can see  
You don't need an appliance  
It isn't rocket science  
God forbid that it ever  
Should be

Read my lips there's no risks  
Attached to what we do  
It may be that at times  
I'm way our of line  
God forbid that meant I could  
Lose you

Only for a second have I ever felt  
Doubts about your love for me  
Only for a second yet it seemed like an eternity

Take my hand make it land  
Somewhere about your knee  
Whatever's going on we're doing  
Nothing wrong  
God forbid to think that  
We could be

Falling out of love is something to behold  
Even when it's not too steep  
You can be as hurt as someone say falling  
A thousand feet

Tell you what what you've got  
Is all I'll ever need  
It may not pay the rent  
It being heaven sent  
God forbid that that's all  
You meant to me
