So can we skip in time to summer
Where we'd just sit and talk together
And I can feel my heart beat faster
While gazing into deep blue eyes

And I,
Can't imagine
Someone I'd
Rather be with
So count the days until
The city lights surround us
With weakened hearts so pure
We'll tear these streets up

Say you're, never gonna leave this town
You're, always gonna be
My first and foremost
My everything
So now, I want, I need
You to make me breathe
Just feel it in the air tonight

Hands intertwined and fingers crossed
Your eyes so clear and so inviting
You say, lets paint this town together
And leave our feelings in the open
