### **"The Rescue"**

Spare us the rescue.  
We're not lost, we just go where we want  
Spare us the rescue.  
When we roll we roll deep and we'll sink twice as low  
Spare us the rescue.  
I can walk, I can walk on my own two knees.  
It takes, takes some, takes some dying to feel alive.  
Spare us the rescue.  
A friend in need is a friend I don't need  
Spare us the rescue.  
We've made peace with our lovely disease  
Spare us the rescue.  
Crawled out o fmy tunnel vision to find  
It all, all went, all went wrong but it feels alright.  
Didn't we enjoy ourselves when we destroyed  
ourselves.  
Whatever happens we're fine  
We're on our last life, we'll make no compromise  
whatever happens we're fine  
Spare us the rescue,  
Back on the street a mile up in the sky  
Spare us the rescue.  
I'm close with my demons there's no need to hide  
Spare us the rescue.  
I've worn out my sins, I need new ones to shine  
It takes, takes some, takes some ding to feel alive  
Didn't we enjoy ourselves when we destroyed  
ourselves.  
Whatever happens we're fine.  
We're on our last life  
We'll make no compromise.  
Whatever happens we're fine, so spare us the rescue  
Where have we been where will we go so far.  
I'm not distant but this distance  
makes all the difference to me.  
Who have we been?  
Who will we be so far?  
It's not visible but we're perfectly comfortable here.
