When the songs done call the radio and tell them play  
it like the first time  
When the songs done call the radio and tell them play  
it like the first time

Every time it feels like the very first time  
Wake up in the morning and I open my eyes  
I see you, you, you...  
Yeah

And every time I put my lips on your lips  
I love the way it feels baby when I do this  
I say oh... everything, everything that you do it makes  
me say oh...  
Baby yeah

When I run my fingers through your hair  
That's when nothing in the world compares  
I just wanna please you, please you girl  
I never wanna see you, see you hurt

Still smell like perfume when it's fresh outta the box  
Wanna wipe you down every morning like the car I just  
bought  
And like the brand new house take off my shoes to walk  
You're still fine like the very time  
The very first time I saw you girl  
The very first time I saw you girl  
Still fresh with the best  
Can't believe I'm getting less  
Still fine like the very first time...

You make my heart go boom boom boom  
When you step up in the room  
Oh what I wanna do to you  
When I get you to my room  
Oh girl oh, this private part is made  
And your body is VIP

When I run my fingers through your hair  
That's when nothing in the world compares

I just wanna please you, please you girl  
I never wanna see you, see you hurt

Still smell like perfume when it's fresh outta the box  
Wanna wipe you down every morning like the car I just  
bought  
And like the brand new house take off my shoes to walk  
You're still fine like the very time  
The very first time I saw you girl  
The very first time I saw you girl  
Still fresh with the best  
Can't believe I'm getting less  
Still fine like the very first time...

When the songs done call the radio and tell them play  
it like the first time  
When the songs done call the radio and tell them play  
it like the first time

Just bob your head, move your feet  
This time make the speakers speak  
Just like the first time  
Just bob your head, move your feet  
This time make the speakers speak  
Just like the first time

Still smell like perfume when it's fresh outta the box  
Wanna wipe you down every morning like the car I just  
bought  
And like the brand new house take off my shoes to walk  
You're still fine like the very time  
The very first time I saw you girl  
The very first time I saw you girl  
Still fresh with the best  
Can't believe I'm getting less  
Still fine like the very first time...

The very first time I saw you girl  
The very first time I saw you girl  
Still fresh with the best  
Can't believe I'm getting less  
Still fine like the very first time...
