[Nadine]

Why don't you fool me, feed me, say you need me,
without wicked games
Come on and hold me, hug me, say you love me, and
not my dirty brain
Why don't you fool me, feed me, say you need me,
without wicked games
Come on and hold me, hug me, say you love me, and
not my dirty brain

I got one Alabama return
That'll take me far away from you
Cause when you take me in your arms I turn to slave
but I can't be saved

[Cheryl]

So I got my cappuchino to go
And I'm heading for the hills again
Cause if we party anymore
We'll start a fire of pure desire
Closer, your minds firing blind
With your head in your face getting red in your heart
beats closer
You fall on your knees and the geek at your feet says
your neat
And the beat gets closer
You dive for the thrill at the kill and your heart's had it's
fill
But it still creeps closer
You wanted to freeze but your weak in too deep and
the beat and the beat gets closer

[All]

Closer, closer, closer, closer, closer, closer, closer
We give it up and then they take it away
A girl's got to live it up
And get her head in the shade
Baby, we give it up
It's just a matter of time
Before all the heavy stuff
Comes back to bite your behind

[Nadine]
You can't mistake my Biology

[All]
The way that we talk (oooooooooh)
The way that we walk (oooooooooh)
It's there in our thoughts

[Nadine]
The magic numbers in front of me

[All]
The way that we talk (oooooooooh)
The way that we walk (oooooooooh)
So easily caught

[Nadine]
You can't mistake my Biology

[All]
The way that we talk (oooooooooh)
The way that we walk (oooooooooh)
It's there in our thoughts

[Nadine]
We're gonna cause a controversy

[All]
The way that we talk (oooooooooh)
The way that we walk (oooooooooh)
So easily caught (caught, caught, caught)

[Nadine]
Why don't you fool me, feed me say, you need me,
without wicked games
Come on and hold me, hug me, say you love me, and
not my dirty brain
Why don't you fool me, feed me, say you need me,
without wicked games
Come on and hold me, hug me, say you love me, and
not my dirty brain

[Nadine]
You can't mistake my Biology

So easily caught (caught, caught, caught)
