Teardrops, rain coming, light shine, song humming  
I never thought you could make me feel

Sunlight, stars shining, strobe lights, worlds twining  
And all this time I knew  
That I won't ever break through

Chorus  
And through it all  
it's only you, the only one  
Who ever helped me get through  
And when I see your lonely face sometimes  
I, I don't know, I feel untwined

Now I realise  
The wake up call you gave me  
It's changed my life

And my heart and soul baby  
And when I, when I think about your loving baby  
It was only you who ever stood by me

Chorus  
When I fall you're there to catch me  
No heartbreak when you're concerned  
And now you've made, made me see how life can be  
(yeah)

Chorus
