english translation

oh, telepathy doo doo doo

pit-a-pat i can't hide my emotions

it feels like i've seen those eyes somewhere "dejavu

the spell that melts and trickles down my lips (can you hear, can you hear it)

a mysterious fragrance embraces the body (fly to the sky)

* our secret, bittersweet love story

it goes to you "how is it, can you hear it- my telepathy?

close your two eyes and imagine "anything is your story

your telepathy will make whatever you want come true

secretively, sneakingly, don't mess with my motion

i've dreamt about you and i and our rendezvous

the signal that i gently send to your heart (doo doo doo, doo doo doo)

reminds me of the electrifying first kiss (come to me)

my melody filled with shy confessions and sunshine

i'm shaking "in this moment "my telepathy

hold my hand and make it the story of you and me

i will always be by your side oh, telepathy doo doo doo

my heartbeat keeps going like big popcorn

my gradual love for you seems like it will burst

* repeat

can you hear it?

never, ever stop falling in love
