When you call to me I will hear you
I'll be near you through storm and strife
And I will love you for sure, for certain
Forever and always for all of my life.

And in the darkest night close together
When winter weather cuts like a knife
I will still love you for sure, for certain
Forever and always for all of my life.

And if the sky should fall and shatter 'round me
And fire surround me through terror's rife
I will still love you for sure, for certain
Forever and always for all of my life.

I will still, I will love you for sure, for certain
Forever and always for all of my life.

For all of my life...
