They say it's from the sky... they say it's from the sky

OK you say, let's go off to bed  
The words from my mouth, my heart is heading south  
Your kiss to the man, lovers take the stand  
You know oh you know... it's just a f\*ckin' joke

Let's go off to bed...  
There's this side of life  
That will always be  
And all your lies lies lies lies lies  
I'll show you everything

Everybody wants it... everybody needs it  
Everybody loves it... everybody loves it

And you know oh you know, it's just a f\*ckin' joke  
So lift up your hearts, some lovers they will part  
The words in my mouth, the hearts still heading south  
It's so upside down, just laughing at the clown

Let's go off to bed  
I'll get you every time  
I'll show you every side

And all your lies lies lies lies...  
I'll get you every time... every time... every time...  
Lies... lies... open up your eyes... next stop the city
